Education

Prof. Rajendra Singh (Rajju Bhaiya) University - Prayagraj

Bachelor of Computer Application (BCA)

Sep. 2024 – Present

Pratapgarh, Uttar Pradesh

Experience

Open Source Developer

Dec 2025 – Present

Multi-Org Contributor (GSoC 2026 Aspirant)

Remote

- Actively contributing to global open-source organizations including **Open Robotics**, **JdeRobot**, and **INCF** (Neuroinformatics unit).
- Refactoring backend logic and optimizing RESTful APIs to improve system performance and ensure code maintainability across diverse codebases.
- Collaborating with international maintainers to identify critical bugs and implement UI/UX enhancements in professional-grade software.
- Utilizing Git and GitHub workflows for seamless version control and collaboration in a globally distributed team environment.

AI Development Workshop

Oct 2025 – Nov 2025

Tenacious Hub Pvt Ltd

Noida, UP (Remote)

- Completed an intensive 1-month workshop focused on Artificial Intelligence fundamentals, covering Neural Networks and Data Modeling techniques.
- Developed Python script for automated data analysis and implemented pattern recognition algorithm on real-world datasets.
- Explored the integration of AI-driven insights into modern full-stack web architectures for predictive data analytics.

Projects

STDAMS (Satellite Threat Detection System) | Python, Flask, AI, Socket.io

April 2026

- Developed an AI-driven autonomous monitoring system for real-time satellite threat detection and telemetry analysis.
- Implemented a robust backend using Python and Flask to process satellite data and identify security vulnerabilities.
- Integrated real-time communication modules using Socket.io to provide instant alerts for suspicious orbital activities.

Technical Interview Simulator | Python, SQL, Cybersecurity, NLP

April 2026

- Developed an automated interview application designed to simulate deep technical evaluations for Python, SQL, and Cybersecurity roles.
- Engineered a logic engine to generate context-aware technical questions, focusing on real-world problem-solving and domain expertise.
- Integrated automated feedback mechanisms to assess candidate responses and provide performance insights.

Omni-Eye (Surveillance System) | Python, OpenCV, SQL, Git

March 2026

- Engineered an advanced surveillance and monitoring system utilizing Python-based computer vision for threat identification.
- Integrated SQL databases to manage and retrieve historical event logs for forensic analysis and pattern recognition.
- Managed version control and collaborative development using Git, maintaining high code quality across the repository.

Technical Skills

Languages: C++ (Strong DSA), JavaScript (ES6+), Python, HTML5, CSS3, SQL (MySQL)

MERN Stack: MongoDB, Express.js, React.js, Node.js, RESTful API Development

Developer Tools: Git/GitHub, Docker, Kubernetes, AWS, Kali Linux, VS Code

Core Concepts: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks

Achievements & Certifications

UHack 4.0 National Hackathon | Certificate of Merit for 24hr prototype.

Feb. 2026

Computer Fundamentals Quiz | Top 10 Ranker & Trophy Winner (College Level).

2025

LeetCode Programming | Solved 200+ problems in C++ (Strong DSA focus).

Ongoing
